

High Conservation Value driving change in Malaysia

March 2019

In this video from Earthworm Foundation, one of our Sustainability Managers, Kaixiang Chin, talks about our sustainability journey with Ladang Rakyat Terengganu (LRT). For the past two and a half years, we have guided and supported them through the process of sustainable practices. LRT is committed to sustainability and has shown that they are ready to take the next step. We want to support and reward good practices, which is why we have decided to fund a HCV assessment for LRT.
